STUDENTS, Share your Science!

We will feature student research through **3-minute Lightning Talks** where you can showcase your environment and health research. In 3-minutes and 3-slides, you will highlight:

1. **Why it Matters**—What is the issue your research is addressing
2. **Research**—Share the steps you took to address the issue
3. **Conclusion**—What did you find and how can it impact environmental quality, human health, policy, or all three!

All student presentations are eligible for cash prizes! Presentations will be reviewed by a panel of judges.

Deadline: April 8th

In Partnership with the University of Kentucky Office of the Vice President for Research and Universities and Organizations across Kentucky.

HOSTED BY
Center for
the Environment
